# Video capture card (V1167A)

Support 4K HDMI to 1080P USB-C/A.

### Description:

Video Capture Card HDMI to USB/Type-C 1080P 60FPS Game Capture Card for Streaming, Teaching, Video conferencing or Live Broadcasting.

### Product Features:

- **HD 1080P 60fps:** Our video HDMI capture card supports input resolution 3840x2160@30Hz, maximum output resolution 1920x1080@30Hz, 1280x720p@60Hz. Capture HD videos at 60fps and very low latency directly to your hard drive.
- **2 in 1 interface, Real-time Preview:** Support USB and Type-C interface computers/mobile phones/tablets to collect and record while meeting different interface needs. The audio video capture card can record HDMI video and audio at the same time, and transmit the audio and video signals to the computer and smartphone for preview and storage.
- **Plug and Play, Easy to Carry:** This portable video capture card is small and thin, easy to take anywhere. No need to install drivers, no external power supply, plug and play, you can just connect your DSLR camera, camcorder or action cam link to your PC or Mac for a seamless experience.
