AUDIOPHILE CONCEPTION

High current G class amplifying stage, working closely with a 768Khz/32 bits Asahi Kasei DAC, constantly deliver high resolution signals, crystal clear trebles, pure voices, and dynamic low-end frequencies.

CONNECTED AND MULTIROOM

Firmly aiming to provide the future of domestic music experiences, Onkyo models embrace every major feature to allow Hi-Res streaming from any platform and multiroom broadcast through Wifi. TX-8470 is coming out of the box as Roon ready certified, chromecast and Airplay capable.

VINYLE LOVERS' "KILLER APP"

As a first ever appearance, Onkyo engineers introduced their last in-house RIAA filter design. The phono circuit is isolated, powered by a dedicated linear analog power supply, and offers two different selectable and specific corrections either for MM or MC cartridges.
